```

Counter.tsx

```tsx
import { useState } from 'react'
import { View, Text, Pressable, StyleSheet } from 'react-native'

export default function Counter() {
  const [count, setCount] = useState<number>(0)

  return (
    <View style={styles.container}>
      <Text>{count} clicks</Text>
      <Pressable onPress={() => setCount(count + 1)}>
        <Text>Click me!</Text>
      </Pressable>
    </View>
  )
}

const styles = StyleSheet.create({
  container: { flex: 1, alignItems: 'center' },
})
```

Urządzenie

Expo

Dlaczego Expo?

łatwy start

`npx create-expo-app`

aktualizacje

łatwe przejście na nową wersję React Native

EAS

build, wysyłka do sklepów i aktualizacje OTA

Dlaczego Expo?

Expo SDK

zbiór gotowych bibliotek

Expo Router

nawigacja oparta na plikach

Expo Go

testowanie bez Xcode i Android Studio

Expo Modules

własny kod natywny w Swift i Kotlin

Expo Go

Your app

Expo Go

For students and learners to test out Expo quickly and understand the basics. It's a playground app, so it's limited and not useful for building production-grade projects.

VS

Development build

Make a build of your own app with developer tools. Supports custom native modules. Intended for production projects.

Zapraszamy na staż zimowy 2027!
